Comelit®
Passion. Technology. Design.

COMELIT DOOR ENTRY SYSTEM RANGE

ADVANCED TECHNOLOGY AND ITALIAN DESIGN IN A RANGE OF SPECIALISED SOLUTIONS GUARANTEED BY AN INTERNATIONAL BRAND.

Founded in 1956, Comelit Group SpA is an industrial company operating on a worldwide scale and specialising in the design and manufacture of video entry, video surveillance, anti-intrusion, home automation, access control systems and antifire.
The company has a strong international vocation thanks to its close ties with the area in which it was created and in which its headquarters are still located today.

Comelit exports to more than 70 countries in the world and, in addition to the Italian headquarters, it consists of 15 branches located in the strategic areas in which it operates: from Europe to the Far East, from the United States to the Middle East. An articulated commercial structure, which integrates a common know-how with the knowledge of the specific needs of each market.

FOCUSING ON MANKIND AND HIS VALUES.

Comelit has always placed mankind at the centre of its vision. This humanist approach is evident in the company's focus on its employees, in the organisation of its working environment, in the ethics governing its relationships with suppliers and distributors, and in the partnership it fosters with installers. Every Comelit product expresses this vision, constructed on the basis of enduring values.

CONSTANT INNOVATION, FRIENDLY TECHNOLOGY.

Constantly looking at the future is Comelit's mission. Innovation through continuous investments in men and technology, is expressed in the design of new solutions, in the name of maximum simplicity and functionality, able to contribute to a better quality of everyday life.

DESIGN: STYLE, PASSION, ART.

Besides placing technology at the service of mankind, Comelit is also a byword for design. Its unique and original style combines the most hi-tech materials with simple lines, clean shapes and cutting-edge colours. Every Comelit product therefore conveys a new concept for living in a space, in harmony with modern architectural trends.

ANSWER WHEREVER
YOU ARE.

COMELIT APP

The Comelit App allows your video entry systems to be managed remotely by smartphones and/or tablets connected to 3G networks or above. It is possible to respond to calls from the entry station, make intercom calls, view recorded videos from the entry station and control the opening of gates and doors. The Comelit APP is available free of charge for iOS and Android devices.

Available on the App Store

ANDROID APP ON Google play

ANSWER CALLS FROM EXTERNAL UNITS

You can answer audio or audio / video calls from a smartphone or tablet locally or remotely (with 3G or higher network).

VIEW AND MANAGE CAMERAS

You can view (live) CCTV cameras and images from the entrance panels.

MAKE AND RECEIVE CALLS FROM OTHER INTERNAL UNITS (IN THE CONTACTS LIST) AND FROM OTHER DEVICES

You can make or answer audio calls from a smartphone or tablet with 3G or higher network to ViP internal units.

VIDEO MEMORY

The Video Memory function allows to record and view videos from external units and CCTV cameras (up to 10 seconds).

ACTUATOR ACTIVATION AND MANAGEMENT

This function is used to control actuators to control lights, gates, barriers, etc.

SAVE YOUR BATTERY AND YOUR DATA

Comelit APP activates itself only when you receive a call, showing a push notification, saving your mobile data and battery.

Gateways and Call log

1456B - MULTI-USER GATEWAY FOR VIP SYSTEM

The Multi User Gateway (MUG) is a device that allows residents to receive calls, view who is calling them and open their door from anywhere in the world on their smartphone or tablet. The MUG is a single device that only requires one internet connection, therefore all of this can be setup without the need to connect to each individual apartment's network –giving significant saving on time and money.

Furthermore, the MUG is flexible in that it can be retrospectively installed onto an existing Comelit VIP door entry system or it can be installed as part of a new build. The MUG has options for all types of budgets as there are three one-off licences to choose from with the MUG.

• Option 1 is to use the App with a physical door entry monitor known as a Slave License
• Option 2 is the use the Comelit App for video door entry calls via your mobile or tablets device only - known as a Master license
• Option 3 is to have a telephone only license that makes an audio only call to a landline or mobile, known as a telephone license.

With the flexibility of the VIP system you can also mix and match these licenses

Like all App's, the Comelit App is reliant on having Wi-Fi or 3G/4G. However for peace of mind that you will not miss a call, there is the possibility to have a telephone call option as a back-up.
The MUG has been designed very much with the installation company and building management Company in mind, it is centrally managed via a very intuitive web interface, allowing the users on the system to be changed, added or deleted.

1456 - MASTER APARTMENT GATEWAY

The Master Gateway gives the possibility for a resident to answer their calls, view who has called them and open the door via their smartphone or tablet via the Comelit App without the need for a Comelit monitor in situ. This device is fitted locally within the property and connects to the local network, once setup the user of the App has the ability to install the Comelit App on up to 15 different devices. This is an ideal door entry system for houses, commercial properties, school, hospitals and many more.

1456S - APARTMENT SLAVE GATEWAY FOR VIP SYSTEM

The Slave Gateway gives the possibility for a resident to answer their calls, view who has called them and open the door via their smartphone or tablet via the Comelit App in conjunction with a Comelit monitor in situ. This device is fitted locally within the property and connects to the local network, once setup the user of the App has the ability to install the Comelit App on up to 15 different devices as well as the physical device. This is an ideal door entry system for houses, commercial properties, school, hospitals and many more.

1459 - CALL LOG SERVER. VIP SYSTEM

Server device for ViP system that allows the recording, storage and playback of calls from external units. Complete with Call-Log administrator software for settings (IP address, date, time, enable audio, video or audio-video recording, recording duration and recording storage time) and recording filters (days of the week, external unit making the call, internal unit receiving the call). Compatible with Windows operating systems. 19 Vdc power supply. Equipped with power supply unit with 100-240 Vac 50/60 Hz input and 19 Vdc output. Dimensions: 190x190x55 mm.
