

A unique combination of experience and skill

Tavcom Technical Services is a specialist division of the Tavcom Group which provides a comprehensive selection of technical and operational services to the international security and surveillance industry. TTS areas of expertise encompass all security sectors from CCTV, Network IP, intruder alarms, access control and all other forms of electronic security to IT systems, counter eavesdropping techniques and personnel and asset protection.

Every year large numbers of end users, manufacturers and installers around the world turn to Tavcom Technical Services to undertake their projects or solve their problems, confident that our team can draw upon an unmatched range of skills and experience acquired during a lifetime in the security industry.

Our ethos of fierce independence is highly valued. Strict impartiality allows us the freedom to select, install and maintain the perfect security system for YOUR precise requirements, whilst our product and system tests and interactive Training Needs Analysis reports are always scrupulously honest and fair.

The TTS team includes systems installers, designers and operators, project managers and auditors, business advisors and technical authors. All have been hand-picked as leading practitioners in their respective fields. Each has unrivalled technical knowledge, a thorough understanding of 'real world' security issues and extensive international experience that allows them to work comfortably within your technical, legal and cultural frameworks, whatever your location.

TTS's impressive array of technical resources includes an advanced product testing laboratory boasting several miles of transmission cables of various forms, dark rooms, external camera housings and chain link fencing compounds.

Prestigious organisations around the globe, from airports and petrochemical plants to the largest commercial centres and military installations choose TTS for security projects large and small, secure in the knowledge that they will receive an unrivalled service. On budget and on time.

Choose Tavcom Technical Services ... and enjoy peace of mind.

TTS ... for clients large and small

From private individuals to high profile corporations, clients around the world turn to Tavcom Technical Services for the design, installation, project management, maintenance, fault diagnosis and testing of a wide variety of security systems.

Internationally, projects have recently been undertaken for the **Australian Airports Association**, the **Kuwait MOI** and **South African Gold Mines** amongst many others. In the UK we have provided CCTV, alarm, access control and integrated services to the **BBC**, **British Transport Police**, **Nationwide Building Society**, **Open University** and a number of **utility companies**. We have tested and reported on the effectiveness of **EAS** tagging systems for a selection of **major retailers**.

We are also proud to have contributed to major developments at **Lloyds Bank** and **The Bank of Ireland**, **Warwick and Surrey Universities**, **British Airways** and London's **King's Cross Regeneration** project.

In addition to delivering full scale security installations we can provide emergency assistance and advice to tackle the most unusual projects and solve the thorniest problems. We can respond quickly to crisis situations and our services may be utilised on a cost-effective short term basis.

Whoever you are ...

Wherever you are ...

Whatever your project or problem ...
