## Creating the plan to deliver and maintain total compliance.

At Green Cross Global, we understand that compliance can be a complex and often daunting task for any organisation. That's why we offer a comprehensive consultancy service to help you create a compliance plan that's tailored to your specific needs.

With over twenty years of experience in the health and safety compliance industry, our team of experts will work with you to gain a clear understanding of your compliance requirements. We'll then develop a strategy to help you deliver and maintain total compliance in your organisation.

With Green Cross Global by your side, you can be confident that you have the clarity and expertise you need to stay compliant. Our services include:

- Health & Safety specialist
- Specialist assessments
- Root Cause Analysis
- Health & Safety management system development
- Workplace audits and inspections
- Risk Assessments (including fire risk)
- Health & Safety culture surveys
- Independent Accident and Incident Investigation

Green Cross Consultancy

“

The Green Cross team have been invaluable in guiding us through the process of establishing a mental health and wellbeing strategy.

The advice they have provided has been excellent and they really took the time to understand our business and our needs. Even midway through the process we are already getting positive feedback from our employees as a result of initiatives which the Green Cross team suggested.

”

Duncan Gray - HR Manager at NeoGen

Green Cross Consultancy

# greencross SOFTWARE

- Always be aware of overall compliance status
- Have total control over all of your Health & Safety training
- Be in control of policies, procedures and processes and deliver best practise
- Utilise technology to provide deskless learning

## Saving Lives with Software.

### Technology that provides awareness and control whilst enhancing the experience.

Technology has revolutionised the way businesses operate. One area where this is particularly evident is in the realm of compliance.

Green Cross Global provides customers with a managed compliance software platform that helps to ensure they have total control over their property compliance, assets, audits, maintenance process and health and safety training requirements.

Our compliance management software provides:

- Property / Estate Management
- Workplace Management
- Asset & Maintenance Management
- Audit Management

Our learning management software provides:

- Easy and intuitive content authoring
- Certification, reporting, discussion, feedback and mobile experience
- Virtual Classroom
- Mobile first learning for deskless and remote workers

Green Cross Software

“

We now manage and maintain our emergency lighting across the campus via the Vision-tag. Our Maintenance Department simply scan the tag using a mobile device and are able to view and/or edit the data presented at site level. It gives us a comprehensive and immediate overview and with the uploading of schedules and documentation, Maintenance are always in complete control of these assets and their operational status

”

Christopher Willis - Head of Asset Management at Anglia Ruskin University

TRAINING

- Global health, safety and wellbeing training
- Voted the UK's best training provider for 3 consecutive years
- Diverse learning delivered globally
- Courses that can be made customisable to your needs

# Saving Lives with Training.

## Delivering the training strategy that ensures compliance

Green Cross Global is an international provider of health, safety and wellbeing training.

Training is an integral part of developing your organisation to change culture, improve performance and achieve your strategic goals. We bring together our education and technology experts to develop the right training for your organisation.

We specialise in Health & Safety, First Aid, Mental Health, Workplace culture and risk training. Our experts can adapt training packages to fit your organisation and our team of experts can support you, whether you're a small manufacturer in a UK town, or a global organisation needing to bring participants from across the globe together.

Green Cross Training

“

We had amazing feedback from managers about the programme and 93% of our managers said they'd recommend this course to others. We've had calls to bring this programme back for 2022, as well as adapt it for all levels, whilst 83% rated content as relevant to their jobs.

Here's what one of our attendees said - "It's legitimized conversations about mental health which is good for our company culture."

”
