Solutions

OmniPost

The Complete Post Room System

OmniPost is a complete web-based barcode mail tracking system for all incoming and internal mail. The solution substantially increases the speed and accuracy of inbound package management

Asset-i

Asset Management System

Asset-i can be used for tracking and tracing the movements of physical assets across multiple locations by scanning barcodes using a handheld mobile device.

Bespoke

Tailored Development Services

Complex or simple, there are times where specialist bespoke software outperforms off the shelf solutions. Connecting to legacy systems, obscure requirements, simplifying procedures, deploying complex equipment are just some of the reasons why clients opt to use ExPD dedicated development services.

OmniCheck

Mobile Inspection System

OmniCheck is a fully user configurable mobile inspection and data collection solution. Utilising a mobile computer, virtually any inspection process and data capture application can be configured.

DWS

Dimension - Weigh - Scan

ExPD offers the most complete range of industrial solutions for automatic identification to improve the performance of your logistics or manufacturing process
