Fire Safety & Extinguisher Storage

A selection of units for the safe storage of fire equipment, including extinguishers and sand.

The Fire Extinguisher Box is manufactured from glass fibre composite, which is ideally suited for external use due to its strength and durability.

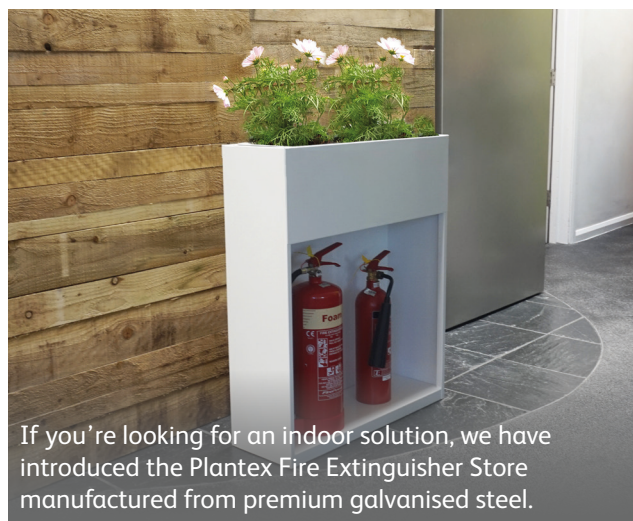

This storage unit is available as a single, double or triple unit dependent on how many fire extinguishers you are required to store.

The extinguisher storage box features a tower bolt to ensure the contents are easily accessible in case of a fire but can also be locked away when not in use.

The Fire Sand Storage Container is manufactured from glass reinforced plastic and comes complete with FIRE SAND white vinyl.

If you're looking for an indoor solution, we have introduced the Plantex Fire Extinguisher Store manufactured from premium galvanised steel.

To bring some life, style and colour to the indoor unit, an internal glass fibre planter liner is fitted to the top; ideal for holding multiple small plants.
