# Food Waste Wheelie Bin Cover

Ideal for communal areas to help improve food waste recycling.

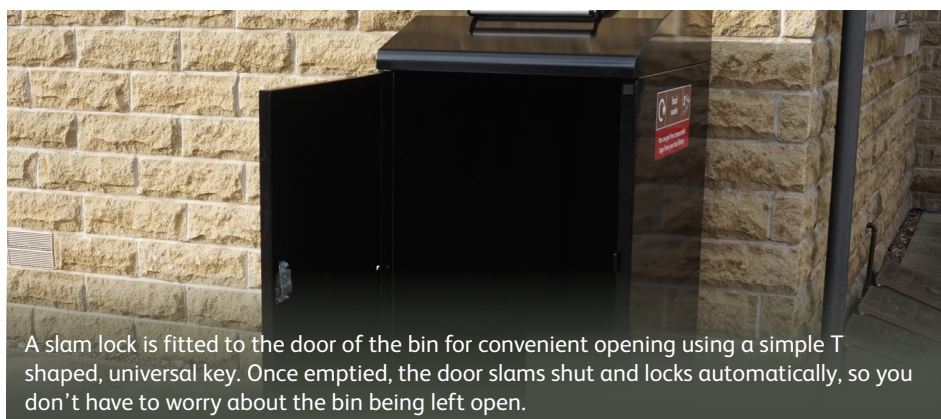

The Food Waste Wheelie Bin Cover is manufactured from galvanised steel and houses either a 140 or 240 litre wheelie bin.

A lift up flap to the lid helps to contain odours and has a stainless steel handle to make opening easy and hygienic.

Being a flexible supplier and manufacturer allows us to create products to suit your requirements. This unit can be designed with bespoke artwork and powder coated in any of our standard colours. An anti-microbial paint can also be used.

A slam lock is fitted to the door of the bin for convenient opening using a simple T shaped, universal key. Once emptied, the door slams shut and locks automatically, so you don't have to worry about the bin being left open.

The front opening door means the internal wheelie bin can be easily pulled out and emptied.
