MLB Steel Litter Bin Range

Our flagship range of external litter bins with a bulkier feel for modern on-street litter solutions.

MLB/112

The MLB range is manufactured from durable 2mm hot dipped galvanised steel, primed and powder coated in your choice of colour.

MLB/160

These litter bins are available in various capacities from 90 litres to a sizeable 448 litres - ideal for light to heavy usage areas.

MLB/90

With its slimline design and small footprint, the MLB/90 can be placed up against a wall or on busy pedestrian walkways.

MLB/224

The larger capacity units are perfect for city centres and shopping centres where it may not be easy to empty on a regular basis.

MLB/336

We can manufacture our litter bins to your bespoke design. Shaped apertures can help the user identify what waste should be deposited, with optional artwork to promote recycling. Additional options include decorative perforations punched out of all sides to discourage fly posting.
