Mega Cycle Wheelie Bin Covers

Perfect to create a recycling point for communal areas and hiding large unsightly wheelie bins.

The Mega Cycle Recycling Wheelie Bin Cover can house a 120, 140 or 240 wheelie bin and looks at home in city centres as well as residential areas.

This Large Wheelie Bin Cover is available with steel or Iroko hardwood side panels to give a contemporary look, with several aperture options, to collect your chosen waste stream.

Being a flexible supplier and manufacturer allows us to create products to suit your requirements; the Royal Borough of Kensington and Chelsea requested their own photographs to be printed to the front of their units.

The Large Mega Cycle Wheelie Bin Cover is manufactured from galvanised steel and available as a 660, 1100 or 1200 litre unit, perfect for hiding large industrial wheelie bins whilst creating a stylish recycling station.

An optional food waste chute can be added to keep waste out of view and contain any odours.
