

Flexiprofiler

Flexiprofiler allows you to remotely assess your drivers performance to quickly and accurately identify training requirements and help get them back on track with e-learning modules.

Remote assessment

Our Flexiprofiler system ensures you can accurately and quickly assess your drivers for any potential training requirements without extensive on-road assessment.

With our online driver profiling service you can quickly understand if there are any underlying issues that need to be addressed and includes an advanced scoring system to easily identify different training needs.

Flexiprofiler benefits include:

- > Remote assessment
- > Online support
- > Driver scoring system
- > Data analysis and reporting
- > Interactive, informative training
- > Vehicle and driver safety and wellbeing

Training

Once you've assessed your fleets training needs, Flexiprofiler's interactive e-learning modules help drivers to understand the best ways to respond to different events. They can learn from mistakes in a safe environment, minimising the risk of on-road incidents.

The service also offers an opportunity for drivers to be open about any wider issues they face that might affect their wellbeing, as part of our Wellbeing of Reflex Drivers programme.
