Confidential Waste Bins

A range of bins manufactured for the secure disposal of confidential information and personal documentation.

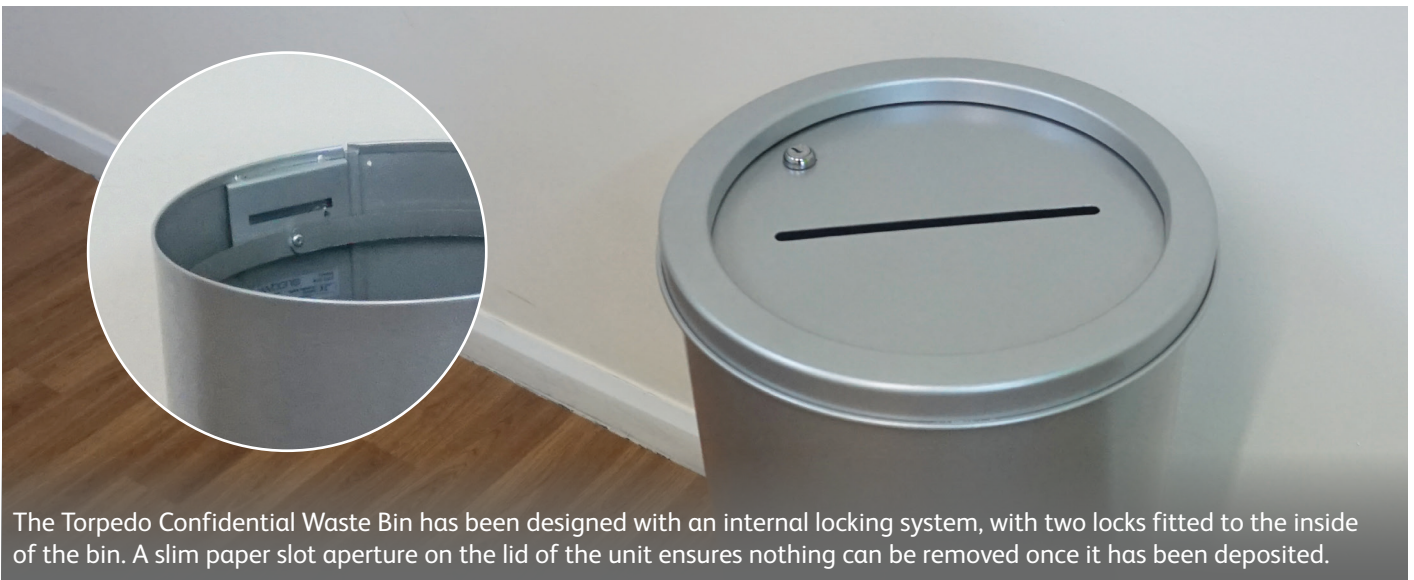

The Confidential Waste Sackholder is manufactured from robust galvanised steel and features a lockable lid to ensure no unauthorised access.

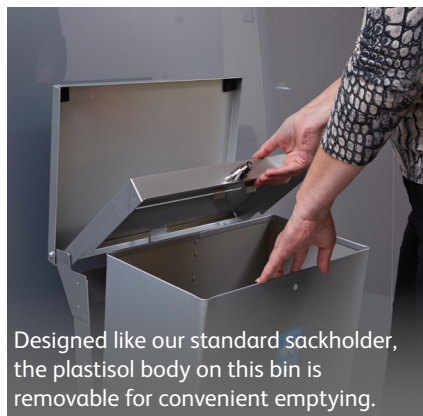

The Torpedo Confidential Waste Bin features an internal sack retention frame fitted to the inside of the body, designed to securely hold the waste bag in place.

The Torpedo Confidential Waste Bin has been designed with an internal locking system, with two locks fitted to the inside of the bin. A slim paper slot aperture on the lid of the unit ensures nothing can be removed once it has been deposited.

The WSC/112 Confidential Waste Bin has a bulkier feel with a 112 litre capacity for collecting larger amounts.

Designed like our standard sackholder, the plastisol body on this bin is removable for convenient emptying.

A Box Cycle version of our Confidential Waste Bin is also available in standard WRAP colours with a lockable lid.
